What members of the Masonic Order often say is that God Geometrizes. While this may refer to many of the beauties of mathematics, it reminds me of the Fibonacci sequence of numbers.

Leonardo Pisano Fibonacci proposed this sequence of numbers in 1202 AD. This sequence is often called the Golden Section, the Divine Proportion, or the Phi Ratio.

The sequence is simple. Starting with the number 1 we say  $1 + 1 = 2$ ,  $1 + 2 = 3$ ,  $2 + 3 = 5$ ,  $3 + 5 = 8$  and so forth and so on. The final sequence looks like this: 1-1-2-3-5-8-13-21-34-55-89-144-233, ... What makes this sequence unique is that each two numbers have a ratio between them equaling approximately: 1.618033989. This ratio graphically expressed looks like a spiral (Figure below).

Golden Ratio Figure

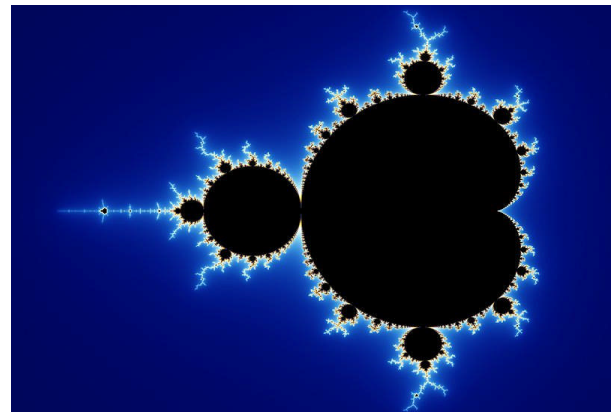

galaxies.

This spiraling ratio can be found through out all of nature, space, and time. The phi ratio can be seen in the spiral of the human ear. This ratio proportion is the same for all human ears everywhere on the Earth (Figure Left). This spiral is found in seashells and spiral

### Fractal Geometry

Dr. Benoit B. Mandelbrot was born in Poland in 1924. He realized that the universe of shapes is not made of squares, triangles, and circles. No, the shapes are different that make up the shape of leaf, tree, or mountain. In the 1970's while working for IBM he showed the world the beauty of fractal geometry for the first time using computer graphics to express his formulas. He created what is now called Fractal Geometry (Figure below).

Mandelbrot Set

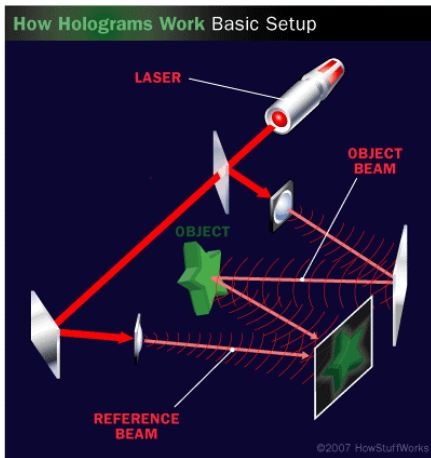

No matter how many times you enlarge a fractal to see its smaller pieces, each piece is the exact shape and proportion as the original scale. Yet, to change the math in one area is to change it everywhere. Fractal geometry is also another expression of the beauty of mathematics. Helena Petrovna Blavatsky once remarked that the science of mathematics was the most perfected of human sciences. Besides the Phi Ratio and Fractal Geometry, I would like to now introduce third phenomena.

### Holographic Photography

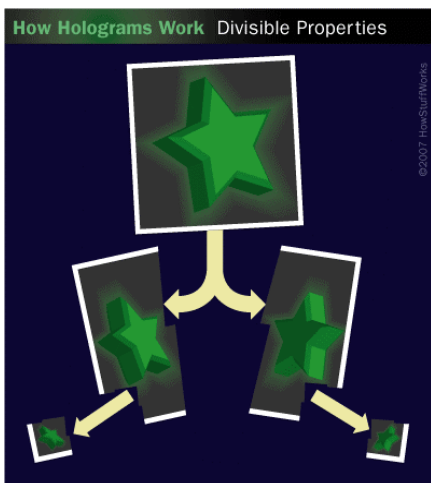

A holographic projection is a projection of a 3D object in space and time. Not many people are

aware that on CNN's Wolf Blitzer's show, on the night of the 2008 presidential election, that for the first time on television, a newscaster was projected several thousand miles into the studios of CNN holographic-ally. The clip to this event is still on Google.

A Holographic photo contains several unique properties. One of them is that the photo itself is a 3D photograph, shot with lasers (see figure below).

The other property is that the photograph itself is infinitely disposable. That is to say, no matter how many pieces you break the photo into, the complete 3D image exist in each piece (see figure below).

The Hologram itself represents the most ancient of mystical maxims by Hermes: *As above so below*.

Jesus the Christ is also made to say in Matthew 16:19, *And I will give unto thee the keys of the kingdom of heaven: and whatsoever thou shall bind on earth shall be bound in heaven: and whatsoever thou shall loose on earth shall be loosed in heaven.*

## Microcosm and Macrocosm

Like the holographic divisible property, each human being contains the whole of the Godhead within himself or herself. This may be hard to accept, but if the universe is holographic as some physicists say, then it must be so. We are the co-creators of the universe with God. We are participants.

Our Divine Spark, the *Atman*, in Sanskrit, is our Divine Ego. We are an expression of it here on Earth. Our Divine Atman is at one with the Divine Matrix that supports and is the foundation of the seen universe.

All of us are at different levels of development. Some of us have become as Christ and can walk on water at will. Others of us are more like St. Peter who try to walk on the water, get so far, and than begin to sink. Most of us are more like the other disciples of Christ that are afraid to get out of the boat of conventional wisdom and wondering if St. Peter is delusional.

Because of certain interpretations of quantum physics it appears that we are all connected through this sub strata of reality known as the Divine Matrix. This leaves us with three understandings:

- (1) The Phi Ratio is everywhere and repeated on every scale from the atom to the galaxy.
- (2) Like Fractal Geometry, each person is the same pattern of God recreated over and over again on infinite scales of recursion and individuality.
- (3) Like a hologram, each piece of the universe is reflected in each other piece fully and completely.

## Accessing the Matrix

According to physicist William A. Tiller of Stanford, we are all destined to become at first students, then adepts, then masters, and finally avatars. Tiller suggests that his research shows that we affect the Divine Matrix through human intention.

Gregg Braden clarifies this further by saying we must express our prayer or intention through the compassion of our heart chakra. This prayer must be egoless and without judgment. It is the blending of our upper chakras (vision and mind) with the

lower chakras (emotion and desire) with the heart chakra as the feeling of compassion. Thus, emotion plus mental focus united as compassion of the heart is the prayer that is always answered.

If one were to see the Matrix as computer hardware, then consciousness would be the operating system and compassion would be the coded software to access the Divine Matrix to get the result you requested (see Figure below).

FUNCTION	ELECTONIC COMPUTER	CONSCIOUSNESS COMPUTER
Hardware 	CPU, Screen Printer	Reality (The Divine Matrix)
Operating System 	XP, Windows, Macintosh	Consciousness
Programs 	Word, Excel, PowerPoint	Feelings, Emotions, and Prayers

As the chart shows by analogy, as we use MS Word to write a letter on the Electronic Computer, the Windows operating system tells the hardware how to put the image on our screen and how to print out our request to the printer.

By the same token, when we use nonjudgmental compassion to access our operating system of higher consciousness on the Consciousness Computer, then does the Divine Matrix manifest our print out of the world.

The key is to see the request already completed, not because you deny the world around you, only because this is the language that the Divine Matrix truly understands.

Finally, the Phi Ratio, Fractal Geometry, and Holographic systems are expressions of the Divine Matrix sending messages to us, through us, from us and for us. We are all connected in the sub strata of reality. We are so connected that if one of us walks upon the water, he or she pulls all of us closer to stepping out of the boat of current wisdom. For you to change yourself is to change everything, everywhere, all the time. This is because you are a Phi ratio-ed, Fractal formed, Holographic-ally projected Divine Being. Peace.
